

REMARKS

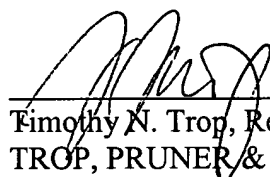

Claim 1 was rejected over the cited Murakami reference. However, nothing in Murakami talks about a frame. Therefore, reconsideration of the rejection is requested.

Moreover, claim 1 has been amended to call for a time division multiplexed frame. Nowhere in Murakami is there any reference to any time division multiplexed frame. Moreover, there is no discussion of a time division multiplexed frame that is filled with asynchronous transfer mode adaptation layer packets.

Therefore, reconsideration of the rejection would be appropriate.

Respectfully submitted,

Date: February 21, 2006
